

# 2-core butterfly optical cable installation quotation

## Overview

Total: about \$4,800-\$6,200. Mid-Range: 2,000 ft mixed terrain, underground conduit, one splice closure, testing package included, permits and restoration. The FTTH drop cable is positioned in the centre. A steel wire as the additional strength member is also applied. The typical self-supporting bow-type drop. Fiber-optic cable materials typically cost \$1 to \$6 per linear foot, depending on fiber count and cable type. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more. Buying fiber optic installation services involves several cost components, with total price influenced by length, location, and access. For larger projects, also verify reel length consistency. Receiving twelve reels of varying length when you planned continuous pulls creates waste and splices. Find wholesale 2 core butterfly optic cable, data communication cable, and much more at Alibaba. Fiber Optic Drop Cable GJXH 2core Butterfly Indoor Telecom Communication Description : The dished lead-in optical cable (for indoor wiring) for access network is made by centering the optical communication unit (optical fiber), placing two parallel non-metallic stiffeners (FRP) or metal stiffeners.
