

211 Distribution Box

Overview

Specification: Item Type: Terminal Distribution Box Model: 2 Level Junction Box 211
Rated current: 125 A. Type: terminal block/wiring block (strip). Product outlet: 2 inputs, 20 outputs. [Professional Quality] The box has a conductive flame retardant brass shell, which can play a good insulation role, the maximum current resistance is 100A. Dust protection design: transparent dust protection design, dust-proof insulation, high safety, you can detect the internal wiring status. Software is provided as is without any guarantees or warranty. The author is under no obligation to provide support, service, corrections, or upgrades to the free software programs or drivers. [Safety Protection] The isolation barriers between. The main function of the distribution block is to supply power to a series of devices more efficiently According to the different installation environment, it can be installed by standard U-shaped DIN Rail or panel screws. Q:Can you print our own logo?

A:Yes, we provide OEM/ODM services.
