

APC is a connector brand

Overview

APC, a flagship brand of Schneider Electric, provides clean battery back-up power, surge protection, and IT physical infrastructure inside and outside the traditional IT environment to deliver certainty in a connected world. Get to know the full range of APC branded offers. Micro Data Centers provides all the reliability, resiliency, and security of a traditional whitespace in a single enclosure solution for Edge environments. APC by Schneider Electric offers guaranteed power protection for computers, networks, and other critical devices in your home office or small. APC by Schneider Electric (formerly American Power Conversion Corporation) is a manufacturer of uninterruptible power supplies (UPS), electronics peripherals, and data center products. What are the differences between APC, UPC, PC?

How to distinguish them?

How to choose between them?

This post will tell. In an increasingly connected world, it's now more important than ever before, to protect information — our most valuable asset — as well as the hardware connected to it. APC Series connector solutions deliver rugged, lightweight circular connectivity for industrial power and signal applications.
