

API power distribution box

Overview

Available in AC and DC varieties, the customized PDUs are designed to specification for OEM platforms and provide innovative power distribution & management solutions, which ensures reliable performance and reduced downtime for increased efficiency and lowered costs. Its product portfolio includes features such as metering, monitoring, sequencing, switching, circuit protection, surge suppression, and EMI. API Technologies announced today that it has expanded its Power and Systems Solutions offering with a line of custom high reliability Power Distribution Units (PDUs) for the following applications; defense, communications and telecommunications networking equipment, data storage systems. NETIO PowerPDU 8KF is a PDU (Power Distribution Unit) with 8 metered power outputs (Type F/ "Schuko") controlled over a LAN network. By default, it is has been designed to fit into a 19" cabinet (1U) by fixed rack mount. NETIO PowerPDU 8KS is LAN connected PDU (Power Distribution Unit) with full. PowerBox factory offers a vast range of PDUs, distro boxes, racks, panels, adapters, cable extensions and splitters to safely manage power distribution, all designed and built to be fully compliant with the safety regulations. As a pioneer of the power and data distribution of the future, LEONI always keeps. Our portfolio covers the full spectrum of Power Distribution Units - from permanently installed wall-mounted units to a wide range of mobile solutions.
