

Annual inspection of unit s electrical distribution box

Overview

The SFG20 44-07 standard requires specific 6-monthly checks that include visual inspections for physical damage, verification of proper labelling, checking protective devices, identifying overheating issues, and ensuring overall functionality of distribution boards. Low-voltage intrusive switchboards regulate and distribute power in buildings and facilities. Multiple circuit breakers or fuses safeguard. Premier Technical Services Group Ltd (PTSG) has identified a significant compliance gap affecting many facilities management companies and building operators across the UK. It covers clear access and housekeeping, panel integrity and corrosion, proper mounting and canopy protection, junction box condition, covered switches and displays, and. Open the distribution box and check for dust and debris accumulation. Ensure all connections are tight and secure. Look for any signs of burnt or damaged wiring.
