BIM is a collaborative way of working that facilitates early supply chain involvement, underpinned by the digital technologies which unlock more effective methods of designing, creating and maintaining our assets. BIM provides a digital representation of the physical and functional characteristics. Download cable tray BIM objects with BIMsmith Market. From industrial cable management systems to office environments, houses of worship, and even performance. Designing with cable trays in Revit has never been easier with the Chalfant BIM library! BIM cable trays help keep complex technology systems looking sleek and simple and add an important layer of detail for any technology-focused building design. We offer a wide range of products to meet the need for safe, smart and sustainable cable management for an even wider range of industries. Materials and finishes available are mild steel pre galvanised as standard with mild steel hot dip galvanised after manufacture and stainless steel grade 1.
