

Cable trays for overhead wiring

Overview

Cable tray systems are the perfect solution for running large quantities of power or data cables overhead or under-floor. Also known as baskets, trunking, or cable ladders, these systems are designed to both route and provide support for vital wiring. It provides speed of deployment, structural integrity, cable protection and ease of use to drive business results. From heavy power cable pathways on oil drilling platforms to data center cabling, explore the cable tray that's strong yet. Our field-adaptable wire basket tray products make installation easy overhead, on walls, or under floors with the help of brackets and supports. Protect cables from dust. Using its global strength and market leading position, Legrand has developed a complete range of cable management solutions for overhead installations. Having manufactured the Swifts cable tray and ladder and Salamandre trunking ranges in the UK for decades, we have local expertise and can respond. ABB designs and manufactures cable tray systems, including perforated tray, cable ladder, channel tray and strut (metal framing), directly from production facilities in Canada and Saudi Arabia.
