

Commonly Used Main Distribution Boxes on Construction Sites

Overview

Surface Mounted Distribution Boxes – Installed directly on walls, ideal for retrofits and industrial environments. BOSECKER construction site power distributors are designed and manufactured in accordance with the manufacturer standard IEC 61439 and user standard IEC 60364. The robust sheet steel housing has been developed especially for use outdoors and is extremely stable thanks to high material thicknesses. Power supply on construction sites is crucial to run all the equipment and tools needed to complete a project. A. Intelligently designed plastic housing with cross-divided inlet and outlet openings integrated within its bottom and cover facilitate in combination with the folding strain relief clamps effortless, time-saving connection of the distributors. Connection time is reduced by up to 50%. This sheet metal part commissioned by a US customer has a high degree of customization and requires precise manufacturing processes to meet the customer's requirements. The sheet metal part needs to have 6 holes of the same size. ENERGYBOX is a complete range of Assemblies for Construction Sites (ACS) pre-wired boards that can be wall-mounted or installed on a support.
