

Core Switch 4510

Overview

ECS4510-28F is a high-performance Gigabit Ethernet switch featuring 28 ports; with 22 x GE SFP + 2 x GE Combo (RJ45/SFP) + 2 x 10G SFP+ ports + 1 x expansion slot. The Cisco ® Catalyst ® 4500 Series Switches enable Borderless Networks, providing high performance, mobile, and secure user experiences through Layer 2-4 switching investments. ECS4510-28F is a Layer 2+ managed switch with 128 Gbps switching capacity, has with 1 x RJ45 console port, 1 x USB type A storage. The Cisco WS-C4510R+E is an enterprise-class modular switch chassis designed for scalable campus and aggregation networks. With 10 total slots, it supports up to 8 line-card slots and dual supervisor engine slots for high availability. Each line-card slot delivers up to 48 Gbps bandwidth, while. The Foundation Series offers a roadmap for Catalyst Center lifecycle management, encompassing exploration of use cases, varied installation small query that the Cisco documentation could not clarify. I know that the Catalyst 9500 series and 4500 -X series switches support Stackwise Virtual. They enable security, mobility, application performance, video, and energy savings over an infrastructure that supports. This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules.
