

# Do high and low voltage switchgear systems require 3C certification

## Overview

The 3C certification, or China Compulsory Certification, is a mandatory certification system established by the Chinese government to ensure consumer safety, national security, and strengthen product quality management. 3C is the abbreviation for the certification mark "CCC," which stands for "China Compulsory Certification. Among the recently announced or newly effective standards is (1) GB/T 14048. 3-2025, Low-voltage switchgear and controlgear – Part 3: Switches, isolators, disconnecting switches and. This guidance is aimed at owners and operators of electrical switchgear in industrial and commercial organisations. It may also be useful to others. It will help managers, engineers and others to understand their responsibilities and duties in the selection, use, operation and maintenance of. Manufacturers, importers, and distributors must comply with key certifications before entering specific markets.
