

Does the outdoor equipment room count towards the building area

Overview

Allowable area- If an outdoor area is determined to be part of the building area, it must then be considered in the code analysis and be included in the building's "allowable area" calculations. " The area included within surrounding exterior walls, or exterior walls and fire walls, exclusive of vent shafts and courts. Some local building codes revise this section to limit the aggregate area of incidental uses to 10% or less, so it is important to check for modifications in the applicable local. Does a patio area need to be part of the occupant load calc?

Existing restaurant A-2, with under 100 OL adds a seasonal covered patio seating area adding 32 seats at grade open three sides outside it's door. Now OL is 132, its over 100 requiring a sprinkler system. Sprinklering- If the rest of your building is sprinklered, for whatever reason, then this outdoor area. You should also check on ASHRAE 90. It is measured from the exterior faces. Occupiable Space - A room or enclosed space designed for human occupancy in which individual congregate for amusement, educational, or similar purposes or in which occupants are engaged at labor, and which is equipped with means of egress and light and ventilation facilities meeting the.
