

# Fiber Optic Digital KVM Engineering Project

## Overview

Fibersystem AB has developed a fiber optic solution for KVM extension to meet the requirements for remote CPU deployment over long distances – up to 80 kilometers. It is the world's first HDBaseT compliant implementation of HDMI transmission over fiber. Matrox KVM extenders can extend signals—such as keyboard, mouse, audio, video, RS232, and USB—over fiber, copper, LAN, or private WAN. It is ideally suited for industrial, digital. The Avio F120 is the first in a new line of fiber-optic KVM designers designed for graphics-intensive and visualization applications. The Avio F120 transmitter and receiver pair extends two single-link DVI video, keyboard, mouse, audio, and USB HID devices from the host system by up to 2000 m (6562. All Rextron KVM Over Fiber Extenders are mostly applied in high-EMI environments where the EMI-Immune nature of the optic fiber system is advantageous. 4 miles (20 kilometers) away from a computer using a single LC single-mode fiber optic cable and 1,968 feet (600 meters) using multimode fiber. etween the host computer and the operating st.
