

How much does a domestically produced fiber optic ODR tester cost

Overview

Prices typically range from \$3,000 for basic models to over \$20,000 for advanced units, depending on features and specifications. A basic singlemode, single-wavelength OTDR from them comes in at just under \$2000. It's very portable, gets decent battery life and has, er, usable software if you want exports of the data. Fiber Optic OTDRs An Optical Time Domain Reflectometer is an important instrument used by organizations to certify the performance of new fiber optics links and detect problems with existing fiber links. Compact size, 5-inch color LCD + touch Screen. The OTDR shoots a laser light down the optical cable and the laser emits a pulse of light at a specific wavelength, this pulse of light travels along the fiber being tested, as the pulse moves down the fiber portions.
