

How much does a meter of 6-core copper optical fiber cable cost

Overview

The current OM4 fibre cable price ranges between \$0.50 per metre, depending on environmental rating, fibre count, and whether it's purchased in bulk or pre-terminated. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more. 6 core fiber optic cable price should be selected by fiber mode, core count, cable structure, jacket material, armor option, tensile strength, installation method, drum length, test report, and order quantity. Main cost drivers include cable grade (indoor vs outdoor, armoured), distance, and labor for trenching, splicing, and termination. This guide presents ranges in USD and practical price estimates to help. The price per meter of these cables varies significantly based on fiber type, construction, and application requirements. Custom-built cables or niche specifications can lead to higher prices.
