

# How to hide applications on a network terminal box

## Overview

This is achieved by granular access control of the installed applications through App Masking Rules. These rules can be used to completely hide the application in an user runtime, so that it no longer appears in the file system, registry or under programs and features. How to map specific folder from a user's PC into a RAS session. By enabling these settings you can ensure that users do not inadvertently access data stored on other drives, or delete or damage. Hello, I am setting up a server 2008, TS RemoteApp box. I am having a slight security issue maybe one of you have seen before. I need to box locked down to where they can't browse anything except maybe a mapped drive like T:downloads. (Mapped drive set via user profile in AD via "Home Folder:". If an answer to your question is correct, click on "Verify Answer" under the "More" button. The answer will now appear with a checkmark. Is there some special terminal command that will hide an open application (essentially the equivalent of typing ⌘ + H from inside the application)?

Something like this is a pretty rough start.
