

How to open a broadband connection when the power is off

Overview

The best ways to stay connected during a power outage are using a mobile hotspot, a backup generator, or a portable Wi-Fi device. These options allow you to bypass local power issues and keep your internet running smoothly. You may also be able to maintain an internet connection during a power outage by using a generator to power your modem or internet. But how exactly are you supposed to keep your home broadband going when the power is out?

It's easier than you think! First, Is Your ISP Ready?

You'll need backup power for your home internet connection, but there's no point if your ISP (Internet Service Provider) isn't doing the same thing. This interruption halts all online activities, from browsing and streaming to smart home device. Invest in an uninterruptible power supply (UPS) — This is a battery backup that can keep your devices online for a short period of time when a power outage occurs, allowing users time to save any work or shut down devices to prevent data losses. The good news is, your internet service is likely still active; it's just your modem and router that have lost power. This guide will walk you through simple solutions, from small.
