

Insufficient WAN ports on the fiber optic router

Overview

If you do not have a modem and only a router with PON or ADSL port, try reconnecting the fiber optics or RJ-45 connector. Check the LED on both Internet and PON. Sometimes, a simple. If you see a red message "WAN Port is unplugged" on the status page of the router, that means the modem is NOT plugged into the WAN Port of the router properly. Please plug it in and make sure the red message will be gone. In either of these routers, you might encounter problems with the cable. If your fiber Internet connection is using GPON technology (as opposed to "plain old" fiber Ethernet), then yes, you need an ONT (aka ONU) as it's the device which actually understands how to connect to a GPON network. Which is correct?

I really need the 4 ethernet ports so is it possible to connect the. This is the first specification to check when shopping for a fiber router.

Article Content
