

Intelligent control equipment for power distribution cabinets

Overview

An Intelligent Power Distribution Unit (iPDU), also known as a Smart PDU or Intelligent PDU, is a critical component in modern data center infrastructure. iPDUs serve as a centralized power management solution that enhances the efficiency, reliability, and monitoring capabilities. ABB Electrification Digital Systems deliver pre-configured and completely engineered grid automation indoor and outdoor cabinets, comprising of constituent products such as Relion REC615 advanced protection and control, hardwired IO unit RIO600, Arctic ARx600 wireless gateways, third party RTUs. Managing and installing a rack power distribution unit (PDU) has never been easier than with the EL2P PDU. Whether that means speeding up Saturday installs or focusing on. This is where precision power distribution and intelligent power monitoring step in—not as upgrades, but as a fundamental shift toward predictive, data-driven power management. This cabinet integrates components such as circuit breakers, transformers, and monitoring devices to safely and reliably manage power distribution across different.
