

Introduction to Smart PDU Ports

Overview

The Smart Power Distributing Unit (Smart PDU) is a compact Distribution Unit, which can be mounted easy and quick into every server rack. It featured several C13 and C19 Plugs and has a voltage and current measurement module. By using the Web-Interface you can configure and switch the Unit in the. Thanks for choosing the 4 Port IP switched PDU with integrated energy metering and monitoring functionality per outlet and redundant TCP/IP port. The SP7040200 is designed for power control and monitoring. It supports up to AC110V~250V 10A IEC C14 power input and four 10A IEC C13 outlets. It not only supplies power to IT equipment in data centers, distributes power to various servers and network devices, but also provides remote monitoring, management, and. A smart PDU, also known as intelligent PDU, goes beyond distributing power to IT equipment within the data center.
