

Nordic 12-core optical cable

Overview

The 12-core GYTY53 is a double-sheathed, steel-armored fiber cable for outdoor and underground installations. It includes a central steel strength member, gel-filled loose tubes, water-blocking yarn/tape, corrugated steel armor, and dual HDPE jackets. Imm (main cord) Material Stainless Steel Color Silvery White UL94 V-0 (*Burning stops within 10 seconds on a vertical specimen, no drips of flaming particles.) *Exact product code is subject to the cable length. Mouser offers inventory, pricing, & datasheets for 12 Fiber Fiber Optic Cables. Multicore optical fiber, on the other hand, has multiple cores passing through a single optical fiber, which drastically increases traffic while maintaining the diameter of the optical fiber. This results in a step index profile. Hollow quartz glass capillaries with a mirrored inside for the transmission of IR wavelengths are ideal for use in CO₂ and Er:YAG lasers.
