

Optical Attenuator Yin and Yang

Overview

Yin And Yang Type Fiber Optic Fixed Attenuator is one end of the connector type and the other end of the adapter type, and the attenuation value is adjustable. Featuring FC/APC connectors with a distinctive yin and yang design, this attenuator is made from durable PEI material, ensuring excellent resistance to heat and. Jumping attenuator used in radar anti-interference: It is a variable attenuator with a sudden change in attenuation. It does not introduce attenuation normally, but suddenly increases attenuation when encountering external interference. From the perspective of microwave networks, an attenuator is a. Network technicians and fiber optic installers, this 10-pack of LC/UPC attenuators is exactly what you need for managing signal levels in your fiber optic systems. These Yin Yang style fixed attenuators provide 20dB of attenuation, which is perfect for when you've got too much power coming through. Do you know?

In the world of optical communication, there is a handy gadget that can make signal transmission extremely smooth - that is the FC/UPC optical fiber Yin and Yang attenuator! Whether it is a male or female connector, it can be perfectly matched and the signal strength can be easily. The Bojan Fiber Optic Attenuator BY-SJ510U1 is a precision-engineered 10dB attenuator featuring LC/UPC connectors with a Yin and Yang design.
