

Small busbar mj

Overview

MJ1 series wire-type mini busbar frame, also known as panel-top mini busbar terminal or MJ1 busbar support, specially designed for secondary circuits of switchgears, ring main units and environmental protection cabinets. The insulation parts are made of engineering plastic which has excellent insulation and mechanical strength. Its voltage drops can't exceed 3. They are used, for example, in assembly, engineering and plastics industries, commercial, office, school and industrial. A Busbar is a clever bit of kit used to make complex power distribution easier, less expensive, and more flexible. - Time-saving (no terminal lugs or having to tighten them). - Better behaviour under short-circuit conditions. - Decreased. nVent ERIFLEX Flexibar cross sections are formed from multiple layers of thin electrolytic copper insulated with a high-resistance, self-extinguishing PVC or silicone compound.
