

# Stacking cable interface optical module interface

## Overview

Stack setup requires only common network cables or fibers but not dedicated stack cables. Optical ports are connected using high-speed cables, AOC cables, or optical modules and optical fibers; electrical ports are connected using Category 6A or Category 7. How to connect StackPower cables?

You can either rack mount the Cisco C9350 series smart switches or install the switch on a shelf or table. You must. Stack member ports in a stack port must be the same type. To use 10GE electrical ports of a CE5855E switch for stack connections, you. This article provides technical data on Fiber Transceivers and stacking accessories compatible with Meraki devices. Cisco Meraki offers branded SFP modules, and while we do not prevent third-party accessories from functioning, users should conduct their own tests to ensure proper compatibility Many. Switch stacking refers to the combination of multiple switch devices that support the stacking feature, logically combined into one switching device. These. The Hardware Compatibility Tool lists the transceivers that EX4100 switches support and provides general information about those transceivers.
