

Touchscreen Explosion-proof Distribution Box

Overview

In high-risk environments like chemical plants, gas stations, and oil depots, safety is paramount. This explosion-proof distribution box features a touchscreen on the small door, incorporating a high-standard explosion-proof design. It effectively prevents explosions caused. Explosion proof display is a kind of anti-riot display terminal equipment, the product uses high resolution display, optional touch function, as used in the explosion-proof scene display terminal, widely used in petroleum and petrochemical, natural gas, chemical industry, medicine, military, civil. After installation or maintenance of the touch screen explosion-proof distribution cabinet in the chemical plant, attention should be paid to keeping the sealing ring at the inlet device tightly pressed to avoid affecting the explosion-proof performance of the product or causing water ingress. The explosion-proof cabinet is of KXDC-T IIC type. Explosion-proof mark: ExdIICT6Gb/ ExtDA21IP65T80°C. It is suitable for hazardous places in Zone 1 and Zone 2 with explosive gas mixtures of Class IIC and Group T1 ~ T6 in factories, and Zone 21 and 22 with combustible dust. Chat with supplier now for more details. Explosion-proof distribution boxes are designed to safely control and distribute electrical power in hazardous environments, preventing ignition risks.
