

What is OS2 and what is its fiber optic price

Overview

15/m (loose tube complexity), \$600–\$1,200/km for outdoor, totaling \$2,000–\$4,000 for 50 km—but spans more without extras, saving 30% over 10 years. Per Cables and Kits, OS2's upfront premium (20%) yields 40% lifecycle savings. This article explains the core differences between OS1 and OS2 singlemode fibers, as well as OM3, OM4, and OM5 multimode fibers—to help OEM clients, installers, and data center engineers make informed decisions. Wolontek standardizes on OS2 for everything. You get the superior “Low Water Peak” glass for both indoor patch cords and outdoor runs—often at a lower price than legacy OS1. It is a. OS1 and OS2 are two standardized categories of singlemode optical fiber used in modern communication networks. Although both support long-distance, high-bandwidth transmission, they are engineered for different installation environments, different attenuation levels, and different long-term.
