

Which company makes hollow optical cables

Overview

Linfiber Technology (Nantong) Co. is committed to the research, development, production, sales, and industrial application of high-performance hollow-core optical fibers. A Hollow-core Fiber is an optical fiber which guides light essentially within a hollow region, so that only a minor portion of the optical power propagates in the solid fiber material (typically a glass). Unlike traditional solid-core fibers, these innovative structures minimize signal loss and. Prysmian Group commands approximately 9-15% of the global market as the world's largest cable manufacturer and a leading supplier of fiber optic cables. Founded in 1879 and headquartered in Italy, the company operates 108+ manufacturing facilities across 50+ countries, enabling truly global reach. This updated list ranks the 20 largest fiber-optic cable companies worldwide and summarizes what each vendor is best known for—core product lines, regional strengths, and typical project fit. Use it as a fast shortlist when planning new FTTH/FTTA or data-center builds. Light travels about 50% faster in a hollow core compared to a solid silica core of conventional optical fiber.
